PITCH DECK

Student voice. Professionally delivered.

Modern media infrastructure for schools — hardware, software, and the workflow that holds them together.

THE PROBLEM

Schools want student media programs. Most cannot sustain them.

The equipment shows up. The excitement fades. Within a term the gear is in a cupboard, the files are scattered, and one teacher is left holding the program together.

- Equipment too complicated for daily classroom use
- Teachers overloaded; no time to manage workflows
- Files scattered across phones, drives and laptops
- Programs depend on one passionate staff member
- No clear path from recording to publishing
- Expensive gear ends up sitting unused

CURRICULUM DIRECTION

Modern education is shifting from content to capability.

The emerging direction of education is increasingly focused not only on what students know, but also on what they can communicate, create, contribute and confidently participate in. EDU Media Systems gives schools the practical infrastructure and programs to operationalise that shift.

- Student voice
- Learner agency
- Communication
- Confidence
- Collaboration
- Creativity
- Wellbeing
- Media literacy

THE SOLUTION

One connected system for modern school media.

Hardware, software, branding, training and ongoing activation — designed to operate as a single ecosystem rather than a pile of parts.

The Podcart
Portable studio hardware

Offloadr
Upload and project software

Producer Mode
Confidence dashboard

EMS Network
Live cross-school sessions

School Identity
Branding & channels

Initiatives
Ready-to-run formats

Training
Onboarding & coaching

Activation
First-term momentum

the PODcart

A complete student media studio that rolls between classrooms.

Foldable, secure and student-friendly. A Mac Mini workstation, integrated screens, professional microphones and remote-guest capability — cable-managed and built to survive a school week.

- Portable media workstation with foldable secure design
- Mac Mini workstation and integrated screens
- Professional microphones, classroom-ready
- Remote guest capability built in
- Cable-managed, student-friendly operation

Offloadr

The missing link between recording and editing.

Offloadr automatically uploads, verifies, organises and prepares media projects for editor handoff — the operational layer that turns a recording session into a clean project.

Session 042 — Quick 15	Verified · 8 files · 12.4 GB
Assembly Recap — Term 4	Uploading · 3 of 6 files
Year 5 Podcast — Ep. 12	Ready for editor handoff
Leadership Interview	Organised · awaiting review

PRODUCER MODE

Simple enough for students. Powerful enough for schools.

A confidence dashboard that tells students and teachers exactly what is working — before, during and after a recording.

LIVE

Recording state

Students can see at a glance whether the session is capturing.

LIVE

Audio status

Per-mic levels and signal health surfaced in plain language.

LIVE

Video status

Frame, focus and source confirmed before takes begin.

POST

Upload verification

POST

Storage health

POST

Project readiness

SCHOOL MEDIA IDENTITY

More than equipment. A complete school media identity.

Student-led media programs become part of school culture when supported by strong branding, clear workflows and ongoing activation.

- Custom media branding
- Logo development
- School-colour integration
- YouTube channel setup
- Upload workflows
- Thumbnail templates
- Overlays & graphics
- Intro / outro packages
- Production templates
- Rollout guidance

EMS NETWORK

A connected student media network for schools.

Schools join the EMS Network and participate in scheduled live podcast sessions, discussions and collaborative initiatives — contributing segments, asking questions and showcasing student voice across schools.

The value is not celebrity culture. The value is participation, confidence and communication.

- Participate live alongside other schools
- Contribute segments and interview guests
- Showcase student voice statewide
- Topics: leadership, wellbeing, debates, careers
- Guest speakers across sport, media and industry
- Scheduled cadence — not one-off events

STRUCTURED INITIATIVES

Schools should never wonder what to create.

EDU Media Systems provides ready-to-run podcast and media initiatives schools can implement immediately, without inventing a format from scratch.

EXAMPLE INITIATIVE

The Quick 15

- 4 students, 15-minute session
- Approved discussion topic, teacher-supervised
- Simple recording workflow on the Podcart
- Exported as classroom-ready media content
- Internal, parent-shared or public — school chooses

PUBLISHING ENVIRONMENTS

Flexible publishing environments for schools.

Schools maintain full control over how student content is shared. Public, private, parent-only — the workflow stays the same.

PUBLIC

YouTube channels

Branded school channels with templates and upload workflows.

INTERNAL

Private libraries

Internal-only content for classroom and assembly use.

PARENTS

Parent-only distribution

Controlled access for families without going public.

OPTIONAL

Vimeo environments

SUPPORT

Permission templates

SUPPORT

Publishing workflows

ONGOING SUPPORT

A supported ecosystem, not a hardware drop-off.

- Business-hours technical support
- Onboarding and implementation guidance
- Workflow support and remote troubleshooting
- Operational coaching and scheduled check-ins

FIRST-TERM ACTIVATION

Most school media systems fail because excitement disappears after setup.

- Activation visits and coaching sessions
- Workflow guidance through the first term
- EMS Network participation from week one
- Embeds the program into school culture

WHY THIS IS DIFFERENT

Most schools buy equipment. Very few build sustainable systems.

TRADITIONAL APPROACH

- Disconnected equipment
- No workflow
- Teacher-dependent
- Files get lost
- Difficult onboarding
- Eventually unused

EDU MEDIA SYSTEMS

- Connected ecosystem
- Workflow-first
- Student-led
- Operational simplicity
- Ongoing support
- Structured initiatives
- Participation network
- Scalable across schools

TARGET MARKET

Built for modern education environments.

PRIMARY

- Primary schools
- Secondary schools
- Education departments
- Media specialist programs
- Leadership and student-voice programs

SECONDARY

- Youth media organisations
- Training environments
- Community programs

BUSINESS MODEL

The subscription is the ecosystem.

Schools are not paying for software access. They are paying for ongoing activation, workflow systems, EMS Network participation, structured initiatives and operational support — the layer that keeps the program alive after rollout.

HARDWARE

The Podcart

Packages from ~$14,999 AUD + GST. Configurable for primary and secondary deployments.

SOFTWARE

Offloadr

Subscriptions from ~$299–499 / month. Per-school licensing with editor handoff included.

SERVICES

Rollout packages

From ~$24,999–39,999 AUD. Implementation, training and first-term activation.

RECURRING

RECURRING

FUTURE

REAL-WORLD IMPLEMENTATION

Built from real school experience.

The ecosystem has been shaped inside an active school — not assembled from theory. Every workflow has run with real students, real teachers and real classroom constraints.

SCHOOL

Prospect North Primary School

Active deployment of the Podcart, Offloadr and Producer Mode workflow.

PROGRAMS

PNTV · PNC Podcast

Student-led video and podcast programs running on the EDU Media Systems stack.

FOUNDERS

Built by people already working in education.

Sam Leverenz

Founder & Creative Director

Digital Media Coordinator at Prospect North Primary School. Founder and lead of PNTV and the PNC Podcast.

Over 20 years in sound; more than a decade working professionally in videography and media production. Background spans music production, live sound, filming, editing and student-led media implementation.

Tom Leverenz

Director of Education Partnerships

Leads the education and implementation strategy behind EDU Media Systems.

Focused on long-term school rollout, partnership development, practical integration and sustainable adoption — building the relationships that keep programs running beyond the first term.

VISION

We are not a podcast company.

EDU Media Systems builds communication culture, learner agency and student voice ecosystems for modern schools — connected hardware, workflow software, participation initiatives and education-focused implementation.

We help schools build communication and media systems students actually want to participate in.

- Infrastructure
- Workflow
- Engagement
- Support
- Participation
- Communication culture
- Student confidence
- Modern school storytelling
