PITCH DECK — 2026

EDU Media Systems

Modern media infrastructure for student voice, communication and digital learning.

THE PROBLEM

Schools are missing modern media infrastructure.

Student voice is becoming central to modern education, but the systems behind it haven't caught up. Equipment is fragmented, workflows are improvised, and programs depend on individual staff to keep them alive.

- Most schools lack scalable media systems
- Teachers are overloaded managing workflows
- Student voice opportunities are inconsistent
- Building a professional digital media program is hard
- Existing systems are fragmented and difficult to manage

THE SOLUTION

One connected education media ecosystem.

EDU Media Systems combines hardware, workflow software and structured programs into one scalable infrastructure layer for modern schools.

INFRASTRUCTURE

EDU Media Systems

The connecting layer — programs, identity, training and ongoing support that keep school media systems alive.

HARDWARE

The Podcart

Portable student media studio. Rolls between classrooms, built to survive a school week, simple enough for students to operate.

SOFTWARE

Offloadr

Media workflow software that turns recording sessions into clean, editor-ready projects automatically.

Offloadr

Media workflow software built for education environments.

The operational layer that turns a recording session into a clean, editor-ready project — automatically.

- Automatic media uploads
- Editor handoff systems

Session 042 — Quick 15	Verified · 8 files · 12.4 GB
Assembly Recap — Term 4	Uploading · 3 of 6 files
Year 5 Podcast — Episode 12	Ready for editor handoff
Leadership Interview	Organised · awaiting review

PRODUCER MODE

Student-friendly production confidence.

Designed to empower students without exposing complex system controls. Admin functions stay hidden — students see only what they need to record with confidence.

LIVE

Recording status

A clear visual signal showing the session is capturing.

LIVE

Audio monitoring

Per-mic levels surfaced in plain language.

LIVE

Camera connectivity

Frame, focus and source confirmed before takes begin.

POST

POST

ALIGNED WITH THE FUTURE OF EDUCATION

Aligned with the future of education.

Curriculum direction across modern education systems is shifting toward learner agency, wellbeing, confidence, communication, resilience and student voice — alongside traditional academic outcomes.

EDU Media Systems directly supports this shift by giving schools the infrastructure, workflows and programs to build confident communicators through student-led media.

Confidence

Practiced in real recording environments.

Communication

Articulating ideas with clarity and structure.

Student Voice

Genuine participation in school storytelling.

EDUCATION PROGRAMS

Structured programs built into the ecosystem.

Schools receive structured implementation support and program frameworks to help staff and students confidently launch media initiatives — without inventing the format from scratch.

- Podcast programs
- Student interviews
- Debates
- Cultural discussions
- Media literacy
- Communication workshops
- Digital storytelling
- Leadership opportunities

BUILT TO SCALE ACROSS EDUCATION

Built to scale across education.

Designed from day one for single schools, multi-campus rollouts and department-level deployments — same hardware, same workflows, same software, regardless of footprint.

TIER 1

Single school

One Podcart, one workflow, one program — operational in a term.

TIER 2

Multi-campus rollout

Standardised deployment across grouped sites with shared identity.

TIER 3

Department integration

Enterprise licensing across regions and education systems.

LAYER

Portable infrastructure

Hardware moves between rooms, sites and events without

LAYER

Cloud-based workflows

Project state, uploads and handoffs accessible from anywhere.

LAYER

Standardised systems

One operating model from primary classroom to department office.

WHY IT MATTERS

Communication is becoming a core skill.

The future of education is not just academic performance. Schools are increasingly being asked to develop confidence, communication, collaboration, creativity and digital capability alongside curriculum outcomes.

EDU Media Systems provides schools with the infrastructure to make this practical, scalable and sustainable.

OUTCOMES

- Confidence
- Communication
- Collaboration
- Creativity
- Digital capability

FINAL VISION

The future of student-led media.

EDU Media Systems is building the infrastructure layer for modern student communication, media literacy and digital storytelling.

DESIGNED FOR SCHOOLS — BUILT FOR THE FUTURE.
